

Test Lead

About Us

We are a small cross-functional team of product managers, data scientists, hardware and software engineers developing a truly unique capability to digitise the world of chemistry. We have an ambitious roadmap of features across multiple products that we will be deploying to our worldwide user base and are looking for someone to lead our Test and QA activities.

The Role

We are looking for a talented, enthusiastic and experienced Software Test Lead to head our test activities across multiple products, managing a small team with a hands on approach to QA with a heavy focus on test automation. Preferred location Glasgow. Munich or remote working will be considered.

Key Responsibilities

- Define and agree with stakeholders a test plan for each software release
- Produce test metrics and reports to support release management and planning
- Manage system (hardware and software) integration testing activities
- Lead the development and maintenance of automated and manual test suite to ensure required test coverage for all software products
- Information Security testing, including engagement with 3rd parties as required.
- Work to improve agile practices, testing, planning and reporting of software development
- Manage the test team, resource planning, coaching and developing skills while planning for future needs.

Key Skills & Experience

- A strong QA mindset, with the proven ability to create effective test coverage working collaboratively with developers in an agile environment
- Strong experience with React or similar and JavaScript
- Requirements analysis and experience working in an agile environment
- Experience working with Webdriver.io, Jenkins or similar
- Experience of developing and successfully implementing a QA strategy for software products
- Excellent communication skills, written and verbal.

Also preferred

- Proven experience leading a team
- Experience with continuous integration/continuous deployment
- Experience defining and improving QA and test processes to drive better outcomes
- Experience of Information Security in a QA context
- German language skills are desirable

Salary and Benefits

- Competitive salary
- 25 days annual leave
11 public holidays
- 4% employer pension contribution
