

26 May 2020

**DeepMatter Group plc**  
("DeepMatter", the "Company" or "the Group")

**Notice of Results**

**Online Investor Presentation**

DeepMatter (AIM: DMTR), the AIM-quoted company focusing on digitising chemistry will announce its audited financial results for the year ended 31 December 2019 on Friday 29 May 2020.

**Online investor presentation**

DeepMatter's CEO, Mark Warne, will provide a live investor presentation, relating to the results, via the Investor Meet Company platform on Monday 1 June 2020 at 13:00 UK time.

The Company is committed to ensuring that there are appropriate communication structures for all elements of its shareholder base so that its strategy, business model and performance are clearly understood.

- The online presentation is open to all existing and potential shareholders.
- Questions can be submitted any time during the live presentation, via the "Ask a Question" function. Whilst the Company may not be in a position to answer every question it receives, it will address the most prominent within the confines of information already disclosed to the market. Responses to the Q&A from the live presentation will be published at the earliest opportunity on the Investor Meet Company platform.
- Investor feedback can also be submitted directly to management post the event to ensure the company can understand the views of all elements of its shareholder base.

Investors can sign up to Investor Meet Company for free and add to meet DeepMatter via <https://www.investormeetcompany.com/deepmatter-group-plc/register-investor?arc=aa6b7cdb-d82a-4ca8-8b07-2df648d6f440>.

Investors who have already registered and added to meet the Company, will be automatically invited.

**About DeepMatter Group plc**

*DeepMatter's long term strategy is to integrate chemistry with technology, thereby enabling a greater use of artificial intelligence and reaching a point where chemicals can be autonomously synthesised through robotics. In the near term this involves the provision of an integrated software, hardware and artificial intelligence enabled platform, DigitalGlassware™, to scientists across research and process development sectors.*

*The DigitalGlassware™ platform allows chemistry experiments to be accurately and systematically recorded, coded and entered into a shared data cloud. The platform is designed to enable chemists to work together effectively; sharing the details of their experiments from anywhere and in real-time, so that work is not needlessly duplicated, time and money wasted, and ultimately so new discoveries may be made faster.*
